EDUCATION

ABES Institute of Technology
B.Tech — Computer Science and Engineering

Ghaziabad
Nov 2021 – July 2025

TECHNICAL SKILLS

Languages: JavaScript, Java, C++, Python, SQL, HTML, CSS
Frontend: React.js, HTML5, CSS3, Responsive Design, Hooks, State Management
Backend: Node.js, Express.js, RESTful APIs, JWT, Authentication & Authorization
Databases: MongoDB, MySQL, Sequelize ORM, MongoDB Atlas
Tools & Technologies: Git, GitHub, Postman, Axios, CORS, n8n Automation

EXPERIENCE

LAUNCHED GLOBAL

Full Stack Intern

May 2026 – Present
Bangalore, India

- Contributing to the end-to-end development and enhancement of a **production-grade education platform**, implementing new features and improving existing workflows using **React.js, Node.js, and Express.js**.
- Developing responsive and interactive **frontend features** using reusable React.js components, hooks, and client-side state management while ensuring consistent UI behavior across devices.
- Implementing and integrating **backend services and REST APIs** for platform features, handling request validation, authentication, business logic, and efficient frontend-backend data communication.
- Performing ongoing **application maintenance, debugging, and performance optimization**, identifying production issues and delivering fixes to improve platform stability, reliability, and user experience.

JIPANDITJI

Full Stack Intern

Jan 2026 – April 2026
Ghaziabad, India

- Developed and enhanced full-stack web application features using **React.js, Node.js, and Express.js**, translating functional requirements into scalable and responsive web solutions.
- Implemented reusable **frontend modules and interactive user interfaces** in React.js, leveraging hooks and component-based architecture to improve code reusability and maintainability.
- Built backend functionality with **Node.js and Express.js**, implementing business logic, request validation, error handling, and API integrations to support core application workflows.
- Designed and optimized **MySQL database schemas** using **Sequelize ORM**, implementing relationships, CRUD operations, and optimized queries for efficient and reliable data management.

PROJECTS

Secure Authentication & User Onboarding Web Application

MERN, CORS, Axios, n8n Automation

Live

- Designed and deployed a **fully functional authentication system** with clean and responsive **Sign Up and Login UI**, ensuring an intuitive and user-friendly experience.
- Implemented **secure authentication and authorization** using **MongoDB**, including **password hashing, session management, protected routes**, and **robust form validation with error handling** to ensure secure credential storage and improved user experience.
- Integrated an n8n automation workflow** triggered on every new user signup to send automated welcome emails and optionally log user data to external services such as **Google Sheets**.

AI Virtual Assistant

Google Gemini API, MERN, Cloudinary, JWT, bcrypt

Live

- Designed and developed an **AI-powered Virtual Assistant** using the **Google Gemini API** integrated with the **MERN stack (MongoDB, Express.js, React.js, Node.js)** to deliver intelligent, context-aware conversational experiences.
- Implemented advanced **user personalization features**, including customizable response tones, behavior preferences, and profile-based configurations, allowing users to tailor assistant behavior based on individual needs.
- Built and integrated **secure and scalable RESTful APIs** to enable encrypted communication between frontend and backend systems, ensuring reliable real-time data exchange and secure handling of user data.
